Amazing New Self Defence Manual Reveals...

"The Fighting Secrets of the Most Dangerous, Most Feared, and Most Respected Soldiers, Bodyguards and Martial Artists in the World--Secrets

That Will Let YOU Stop Any Attacker

Super-Fast!"

"Now, you can have the confidence and 'explosive moves' to easily protect yourself (and your loved ones) from physical harm or life-threatening situations using an amazingly 'simple' fighting system... no matter what your age or physical condition -- even if you've never been in a real fight before!"

Dear Reader,

Allow me to introduce myself. My name is Buz Champion. I have trained in the Martial Arts for many years reaching a senior level. As well as, being a one-time member of an elite unarmed combat training team, tasked with the job of teaching raw but-battle hungry military recruits who were about to serve in the dark alleys of some of the most unruly and barbaric areas of the world.

As a result, I have trained with hundreds of people who are used to handling volatile situations. During that time I have been able to evaluate dozens of different self defence and fighting systems. Some good. Some poor. Hence, what I've learned is both hard hitting and straight forward and could change the way you train forever.

Quite simply, I've gained an understanding of the limitations of what people using certain types of systems in various combat environments can or more importantly, can't do. Being personally involved in teaching hand-to-hand-combat techniques to combatives meant, I didn't have weeks to show them what to do. Plus, it had to be very powerful and easy to remember.

"You Don't Need Previous Training Or Experience... You Don't Need Big Muscles Co-Ordination Or Be In Good Shape"

So it was imperative to find and use no ifs or buts just pure-out-and-out devastation techniques that work speedily and effectively. You see, soldiers just don't have the time. Truth is, that's how the SSDT manual came about. Of course, it had to be user-friendly, so that anyone could learn to use the proven and devastatingly powerful techniques to good effect. Even so, I won't tell you that my way of real and ultra-effective street self defence is the only way. It's not.

All in all, on my travels, if there's one thing that I have learned it's this...If you are to survive any violent street situation. It's not how good or how many different techniques you know. It's how you need to master only a few good ones in order to successfully protect yourself.

What's The Risk Of Attack? The Shocking Truth!

Yet, what I am about to tell you may even be a little shocking and unsettling for some people...

Sooner or later, there comes a time in everyone's life when they have to face reality when some mad crazed thug attacks you unprovoked and *completely* by surprise. You see, I'm talking about being *attacked* -- brutally, mercilessly, and viciously by someone who is determined to hurt you.

Yes, it happens to people like you and me every day. Dozens of times each day, to be exact. But people still go on believing that "it will never happen to them." Until it does.

If Violence Heads Your Way Are You Ready?

If, deep down, you know that the answer to that question is "NO"... then please keep reading. Because I'm about to reveal to you *an incredibly effective fighting system* that will help you to survive ANY hostile encounter you are likely to face.

If You're Worried... Don't Be...

⇒ *It doesn't matter if your attacker is much bigger and stronger than you.*

⇒ *It doesn't matter if he is much faster and meaner than you.*

⇒ *It doesn't matter if you've never been in a real fight in your entire life.*

Let me show you, how to stop an attacker in his tracks. A move that is so hard and fast he won't know what hit him.

You've got to realize that violence can happen anywhere, any time, any place. It's your responsibility to have the skills and techniques to protect yourself and your loved ones. Here's how...

The fighting system I'm talking about is revealed in a new manual that I have compiled only the best and most effective tactics that are easy to learn and use. But you won't find them in any "martial arts" schools.

The manual is called "**The Power of Simple Self Defence Tactics**" -- It's information packed and it teaches you exactly what you have to do -- in ANY situation (both mentally and physically) to beat an attacker.

But here's the best part about this manual...Unlike most martial arts this one does not take you several years to master. No complicated movements in order to use them effectively.

... Introducing ...

"THE SECRET POWER OF SIMPLE SELF DEFENCE TACTICS"

Here's Just Some of What You'll Find Inside Simple Self Defence Tactics...

- **What the violent street thugs, don't want you to know!**
- **How to make techniques your natural response to a violent attack where every second counts!**
- **How not to make Hollywood-style mistakes that will get you seriously hurt or even killed.**
- **Avoid wasting time and money. This manual reveals the information you need to out maneuver your attacker and where...**

When you're faced with a life-threatening situation where the attacker wants to hurt you every second counts!

In those deadly situations, you don't have time for complicated fighting styles, fancy-spinning kicks, or Hollywood-style stunts. Those things will get you killed. That's why this *SSDT Training Manual* reveals a powerful "quick to end" fighting system.

- **There are no complicated moves!** You don't have to remember hundreds of confusing blocks and strikes! Just simple unbelievably effective moves that can be learned and mastered in only a few hours.
- **You don't have to be quick, or coordinated, or even in good physical shape!** You don't even need any prior fighting training. *You already know most of these movements.* I just show you what to do and when to do them. These are natural body movements that anyone can use *very effectively* to defend themselves.
- **You don't need to train constantly to master this system!** Most of us don't have the time to waste -- we have a life! That's why this system is designed to turn you from beginner into a master in just a few short hours. All you have to spend is a few minutes per day training.
- **You'll learn** a "fighting system" that focuses only on teaching you one thing -- how to walk out of any physical attack *alive*, using simple and proven moves in a stunningly short time.

- **"The Warrior Mindset."** I reveal why a single mindset will mean being a victim or being safe and why it can improve your fighting power by 10 times!

WARNING!

But... before you get this manual, I must warn you that...

It's A Hardcore Self Defence System That's Not For Everyone

However... if you're looking for a system that will help you walk away from dangerous situations alive and unharmed, this manual is created just for you.

It has everything you need to quickly and easily learn to defend yourself. But it's not foolproof. There is no mystical secret to how to do it. You just need to fight smarter.

Even so, the best techniques to use are the ones your attacker does not know or expect.

The truth is I'm not the greatest athlete. Like most of us, I wish I were, but I'm not. And neither are 99% of others who train either. They are just normal people who want to learn how to protect their family, property and their lives.

But first, you must build a solid foundation and understand that true mastery of the basics is the number one thing you must learn. Ask any professional athlete you must learn the basics in order to be successful. And that's just part of what you will be shown in the SSDT manual.

You Can Beat Them...Learn to Fight Back and Win.

*Even more reasons to get.. **The Power Of Simple Self Defence Tactics...***

- **It's 100% more effective.**

"And It's All The Skills You Need To Protect Yourself"

And in case you're wondering this information has been compiled so it's still fresh and completely valid. Unlike others that tease you with information, which is at best outdated.

Forget all the free advice you have read on how to become an expert fighter in one day. It's bullshit. Because if you think you can, then think again. I can show you a cut-to-the-chase system of self defence that will help you beat any attacker real quick.

But, you will have to train at least 15 minutes a day. Which means, for the less active amongst us, getting yourself all hot, and sweaty. Only for a short while though. There I've said it now but it had to be said.

The techniques have nothing to do with spending hours, months, and years learning hundreds of complicated techniques or paying club fees. **You can train at home. It's easy to implement, and you can start using the techniques within the next hour.**

There's nothing worse than having to shell out your hard earned cash to buy some worthless information. But unfortunately millions of people unwillingly do every single day.

As you probably know thousands of people are attacked every day, and if you don't know what to do if you are one of them. Then you might be in for a long spell in hospital or even worse.

So what's the catch? Why am I practically giving this manual away?

The answer is simple, I'm fed up with people time and time again being handed complete garbage by some so-called expert. It just does not help. If you want to waste your money then this manual isn't for you. I don't want your business.

So How Much Is All This Information Worth To You?

I've searched the internet at every available moment looking for other systems that worked. And I didn't find anything that actually worked as well as simple self defence tactics.

Problem #1 The free books and lists are often old and outdated. They show 1000's of moves and maybe only a handful of those are valid in today's violent environment. The truth of the matter is that only a few products are any good.

Problem #2 The fee based web sites out there often get their information from the free sites. Basically these sites and operators are just looking to make some fast money. They've never been in the heat of battle. They don't even check to verify the information before they sell it...

No wonder, some of the techniques they offer are down right dangerous and if you tried to use them on the street they would get you seriously hurt.

Other sites are charging \$80 to \$200 for their resources. Many of them are selling the same misguided and non-workable systems. Sites that make you subscribe to receive free reports in exchange for some useless piece of information.

For \$27 you'll get a fully illustrated 55 page training manual that is full of tried and tested self defence techniques and useful information that actually works.

You'll know exactly what to expect and you have my personal guarantee you will learn something from the SSDT manual or your money will be promptly returned.

You may use Visa, MasterCard, Discover or American Express to order or Paypal. I also accept Post Office money orders (Please email me for mailing address).

I will not have access to any of your credit card information. I will only receive notice that you've made a payment.

You will be given immediate access to the manual once your payment is received. (Once your order is complete you'll be taken to a receipt page. When you reach the receipt page simply click on the 'click here' to continue button. This will take you to the download page.

Remember, everything in life is about preparation and "planning ahead." You never know when danger could be headed your way. These days, violent and abusive thugs don't even need a reason to draw blood. All it takes is an innocent "look" in their direction from some unsuspecting individual -- that's enough to get these abusive types to snap!

Don't wait for it to happen. Get ready now -- when you have the opportunity, and the time, to do so. The better prepared you are, the better chances you will have of success.

Sincerely,

Buz Campion.

Good luck and stay safe.

PS. In case you're nervous about ordering from somebody you don't know, I want to reassure you that that you are not dealing with some fly-by-night. I run several web sites that help people including:
